Heat exchanger
C325852 Core – C173155 System

Air to air

Meggitt's heat exchanger is designed for use on aero-derivative and large frame industrial gas turbine engines. With millions of field operating hours, this design continues to prove the high reliability of Meggitt technology.

Specifications

Function:	Air to air; bearing cooler
Line pressure:	Inlet – 92 to 308 psia; Outlet – 84.5 to 293 psia
Inlet air temperature:	785 to 960°F
Outlet air temperature:	200 to 350°F
Cold side flow rate:	925 to 1175 cfm
Ambient temperature:	-20 to 120°F
Heat transfer:	220,000 to 530,000 Btu/hour

Five configurations available

Key features

- SAC turbine engines
- flanges and headers;
Inconel and nickel heat
exchanger materials
- under normal conditions

Meggitt Control Systems
Our product competencies & services:
Aerospace valves | Thermal management solutions | Environmental control systems | Electro-mechanical products
Ground fueling products | Energy products | Aftermarket services
